

Welcome to...

DermaGRID PRO

...assess clients onsite or
through email correspondence

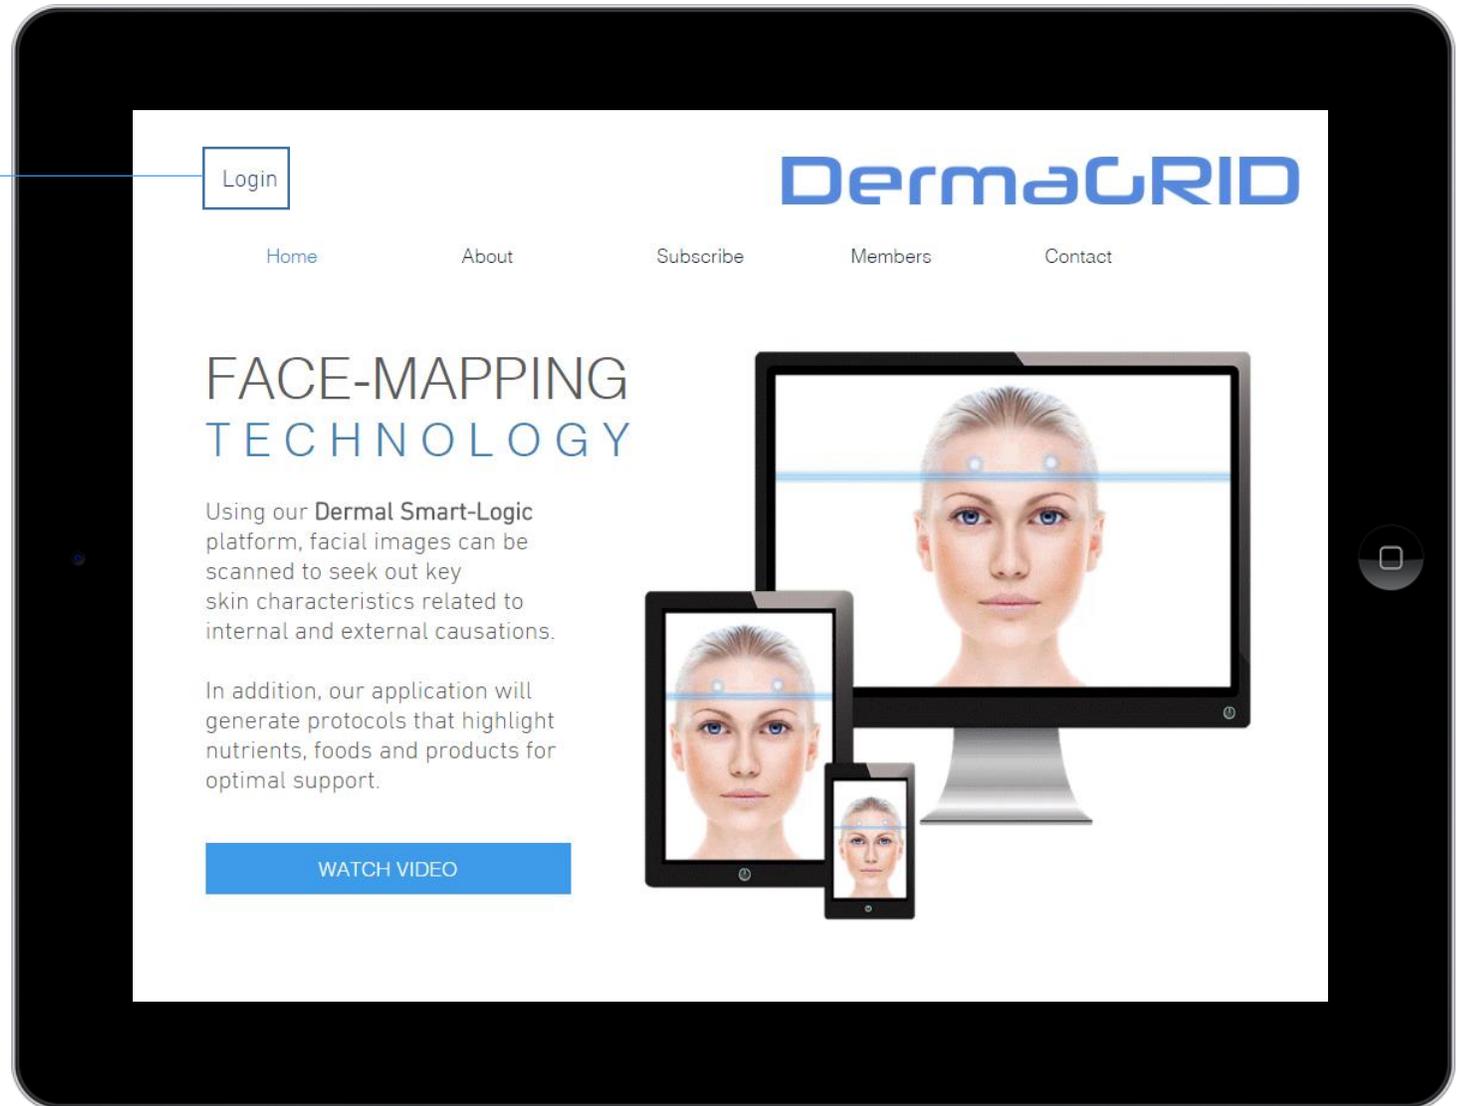

- ✓ **Improved Pricing Options**
Our company strives to offer the best pricing available to professionals seeking our comprehensive services.
- ✓ **Facial Imaging Technology**
Professionals can now scan facial images to identify key characteristics and correlate internal factors.
- ✓ **Enhanced Dermal Outlines**
Our Dermal Summary page has been updated to provide concise protocol directives for optimal support.
- ✓ **In-Depth Professional Reporting**
Upgrade to a comprehensive report detailing foods, nutrients and targeted supportive measures.
- ✓ **Food and Product Charting**
Review optimal foods and other supportive elements including herbs, essentials oils and homeopathics.

INTAKE FORM

Enter basic information regarding your client.

NOTES:

Demographics are important for the cross-comparative analysis and stats provided on the pro-report. (Client email is optional.)

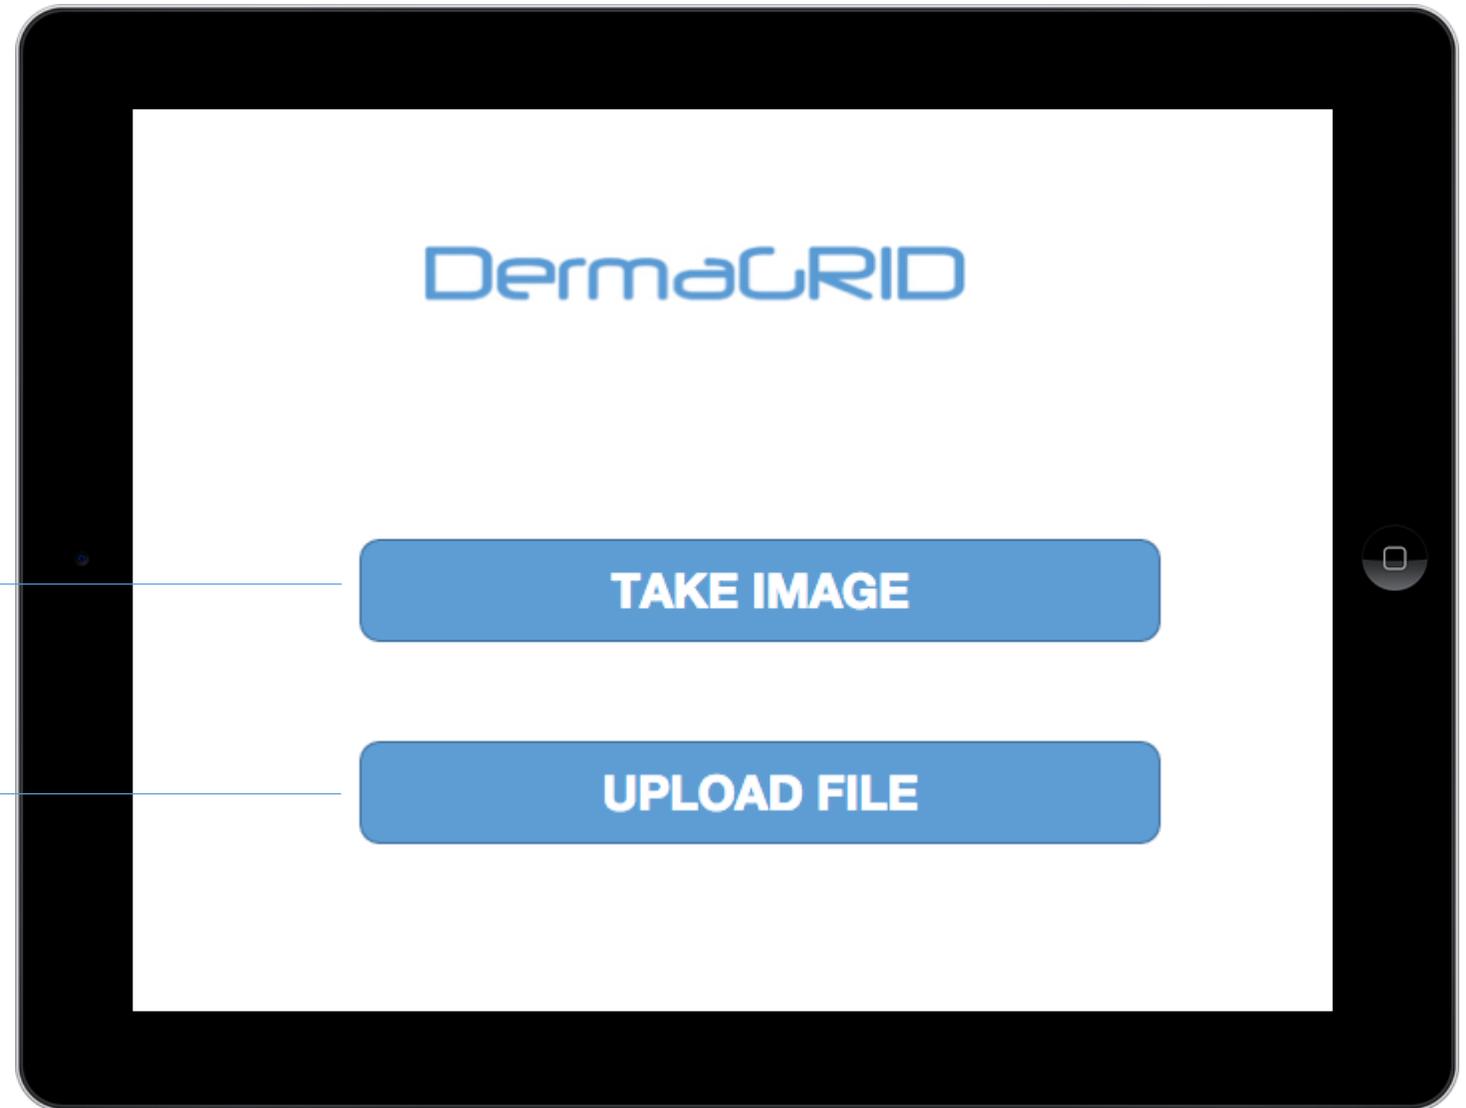

The image shows a tablet displaying a digital intake form for 'DermaGRID'. The form is titled 'DermaGRID' in blue text at the top. Below the title, there are seven input fields stacked vertically, each with a light blue border and rounded corners. The fields are labeled: 'Name', 'Client Email', 'Age', 'Weight', 'Height', 'Area of Scan', and 'Gender'. The 'Gender' field has a small downward arrow on its right side, indicating it is a dropdown menu. At the bottom of the form, there is a blue button with white text that says 'SAVE & CONTINUE'. A blue line connects the 'INTAKE FORM' title to the top of the tablet screen.

ONSITE IMAGE

Take an image onsite with a smartphone or tablet camera.

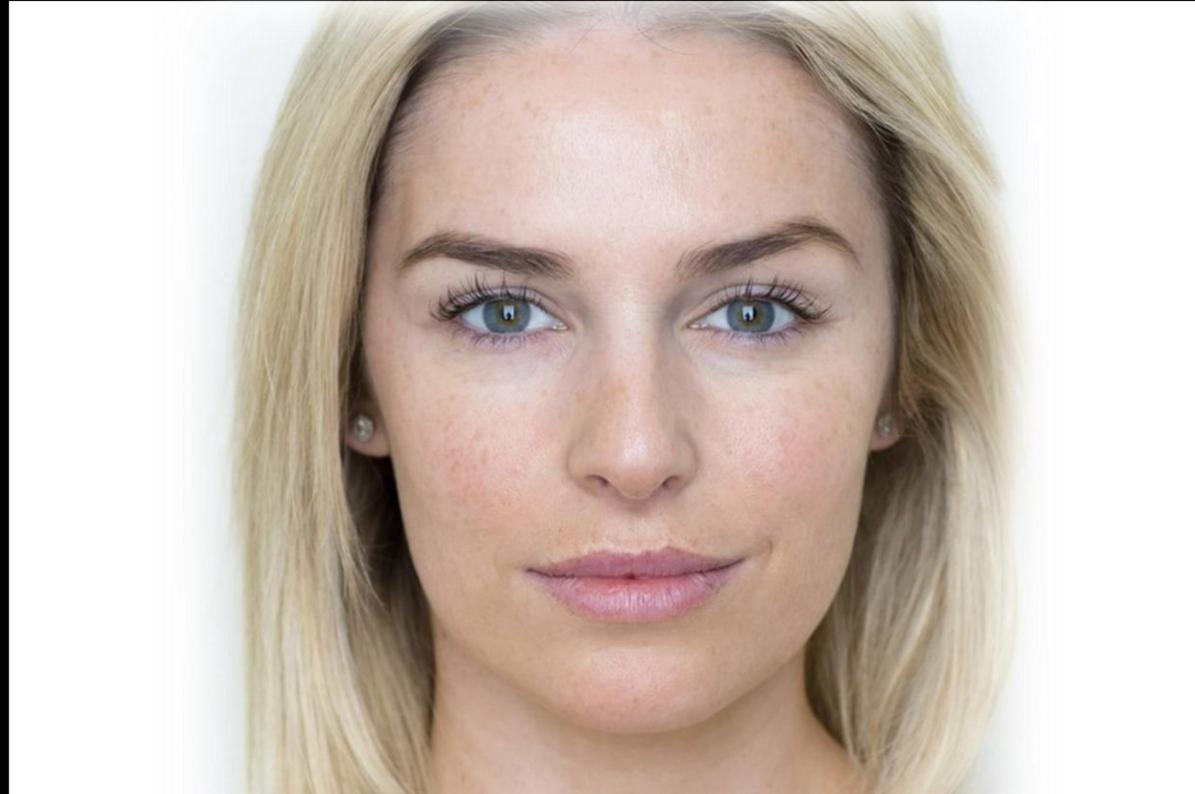

Upload an image sent via email or text from your client.

UPLOAD IMAGE

Taking Image

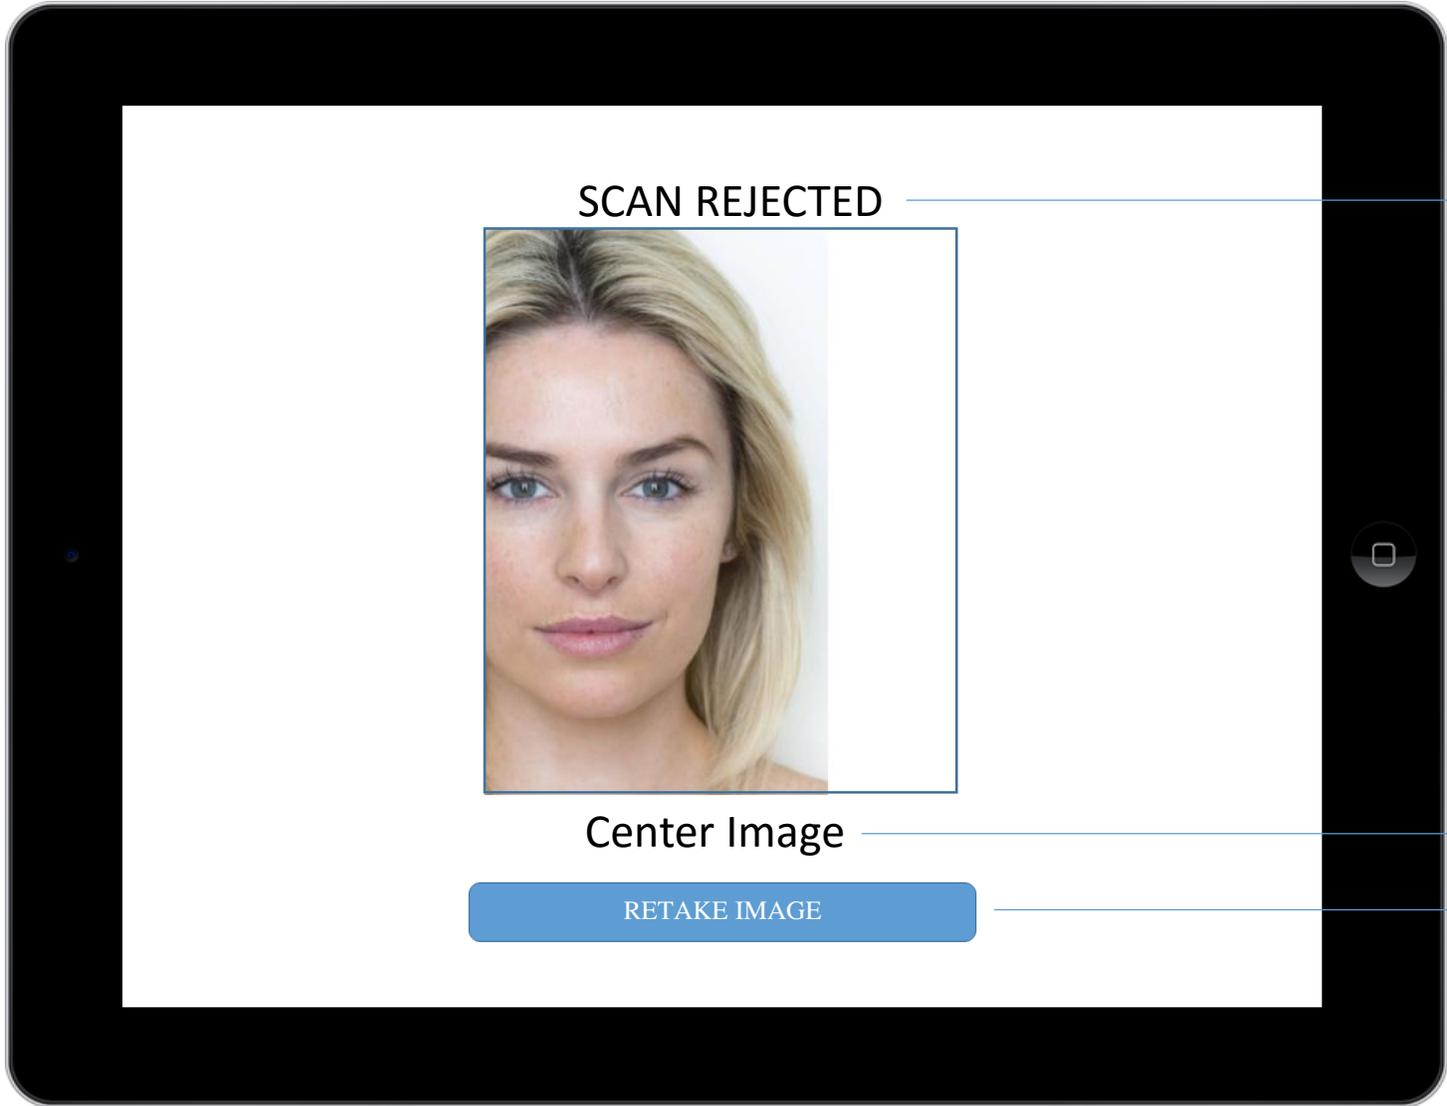

Make sure the dermal or facial image is centered with high clarity and lighting.

Allow 5 minutes to process and verify the dermal image.

PROTOCOL

This section will highlight the overall wellness direction most supportive to the client.

ESSENTIALS

This section will highlight the key essential nutrients identified as optimally supportive.

Referenced Protocol

Cleanse

Identified Essentials

Vitamin B3 (niacin) x2

Vitamin E x1

Selenium x1

Glutathione x4

Determined Products

EMPHASIS

The higher the number next to each nutrient, the more emphasis of supportive properties.

PRODUCTS

The best-matched products for your client are listed based on the generated data.

NOTES:

Products are selected from discretionary companies within your account. You may choose 1 or 2 companies to add into your database. To revise these companies, please contact our customer support.

Key areas of focus are emphasized within this section.

THE PRO REPORT

ALL information found on the basic report is within the PRO GRID Analyzer Report.

The GRID Analyzer is designed to provide practitioners and clients an in-depth version of the basic report with comprehensive insight and quantitative explanations.

Each section first provides the data found on the basic report and then interpreted details and measurements to aid practitioners with prioritization.

SECTION 1 - PROTOCOL

The Referred Protocol reflects that of the basic report with detailed information listed below including projected age (based on comparable appearance features) and the percentile of cross-comparative ratios with same and opposite genders. (There is no alarm if there is a high ratio with the opposite gender; it is simply illustrating how the data was obtained.)

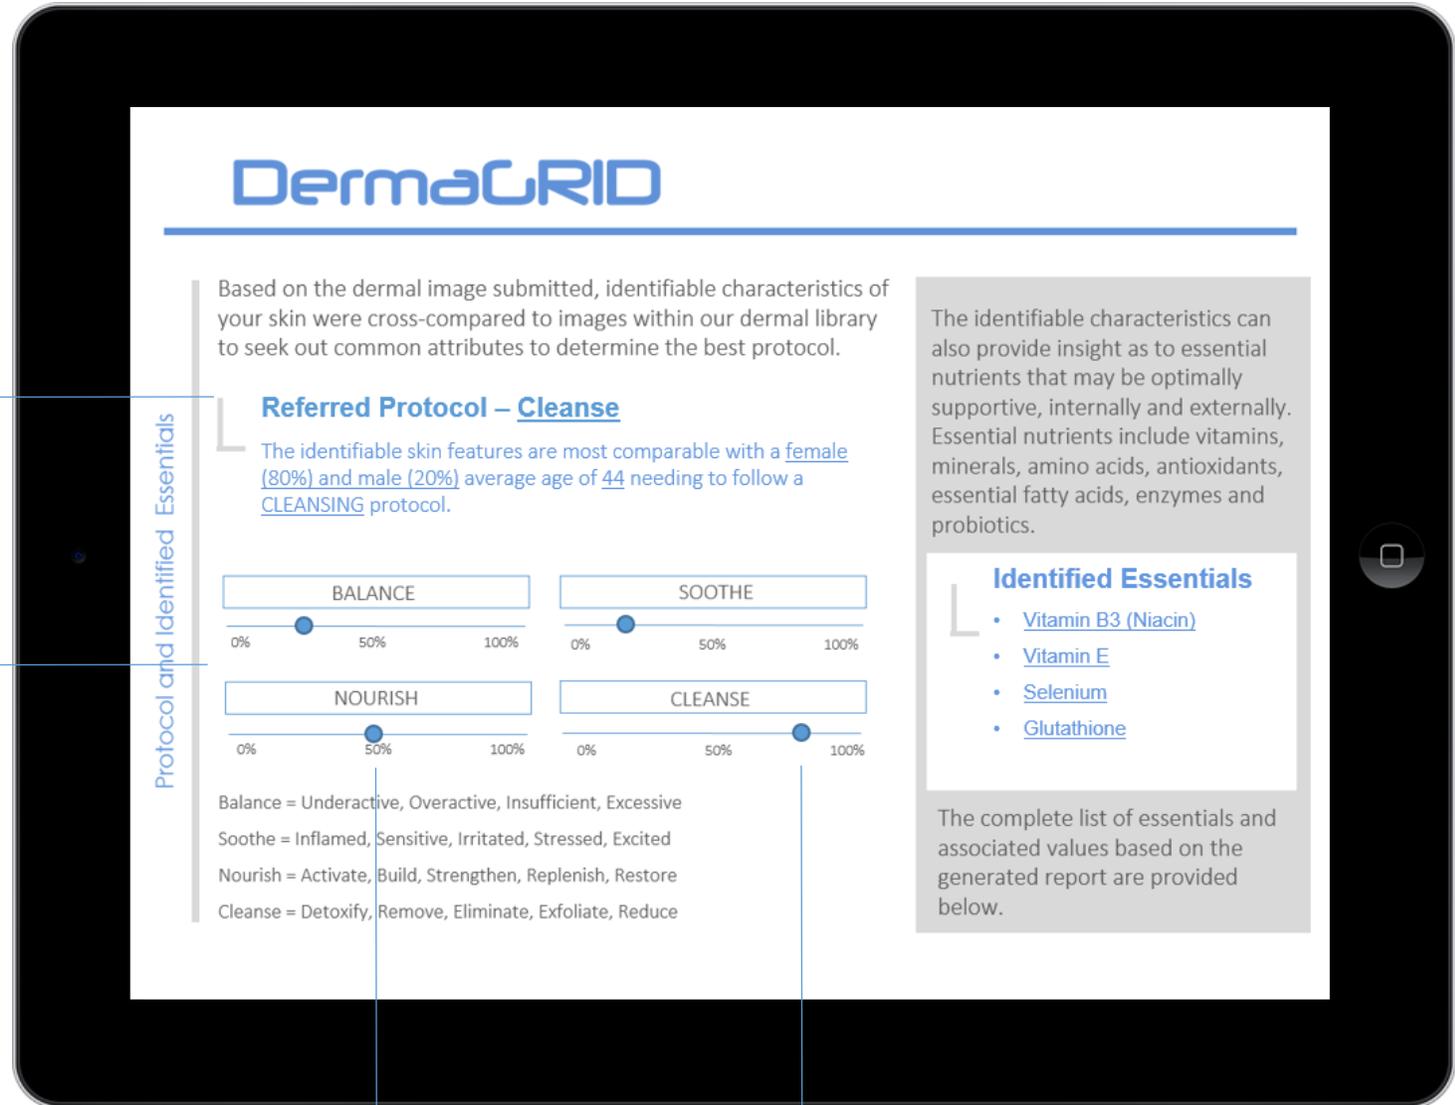

Four main protocols are considered for each client evaluated utilizing DermaGRID. The relevance and priority of protocols are displayed.

KEY:

No Supportive RELEVANCE

Maximum Supportive RELEVANCE

Secondary Priority
NOURISHING

Main Priority
CLEANSING

SECTION 1 - ESSENTIALS

The Identified Essentials (as reflected on the Basic Report) are provided here in Section 1 with some general information.

Section 2 provides a comprehensive overview of the Identified Essentials considered.

DermaGRID

Based on the dermal image submitted, identifiable characteristics of your skin were cross-compared to images within our dermal library to seek out common attributes to determine the best protocol.

Referred Protocol – Cleanse

The identifiable skin features are most comparable with a [female \(80%\)](#) and [male \(20%\)](#) average age of [44](#) needing to follow a [CLEANSING](#) protocol.

Protocol and Identified Essentials

BALANCE	SOOTHE
0% ● 50% 100%	0% ● 50% 100%
NOURISH	CLEANSE
0% ● 50% 100%	0% ● 50% 100%

Balance = Underactive, Overactive, Insufficient, Excessive
Soothe = Inflamed, Sensitive, Irritated, Stressed, Excited
Nourish = Activate, Build, Strengthen, Replenish, Restore
Cleanse = Detoxify, Remove, Eliminate, Exfoliate, Reduce

Identified Essentials

- [Vitamin B3 \(Niacin\)](#)
- [Vitamin E](#)
- [Selenium](#)
- [Glutathione](#)

The identifiable characteristics can also provide insight as to essential nutrients that may be optimally supportive, internally and externally. Essential nutrients include vitamins, minerals, amino acids, antioxidants, essential fatty acids, enzymes and probiotics.

The complete list of essentials and associated values based on the generated report are provided below.

SECTION 2 - ESSENTIALS

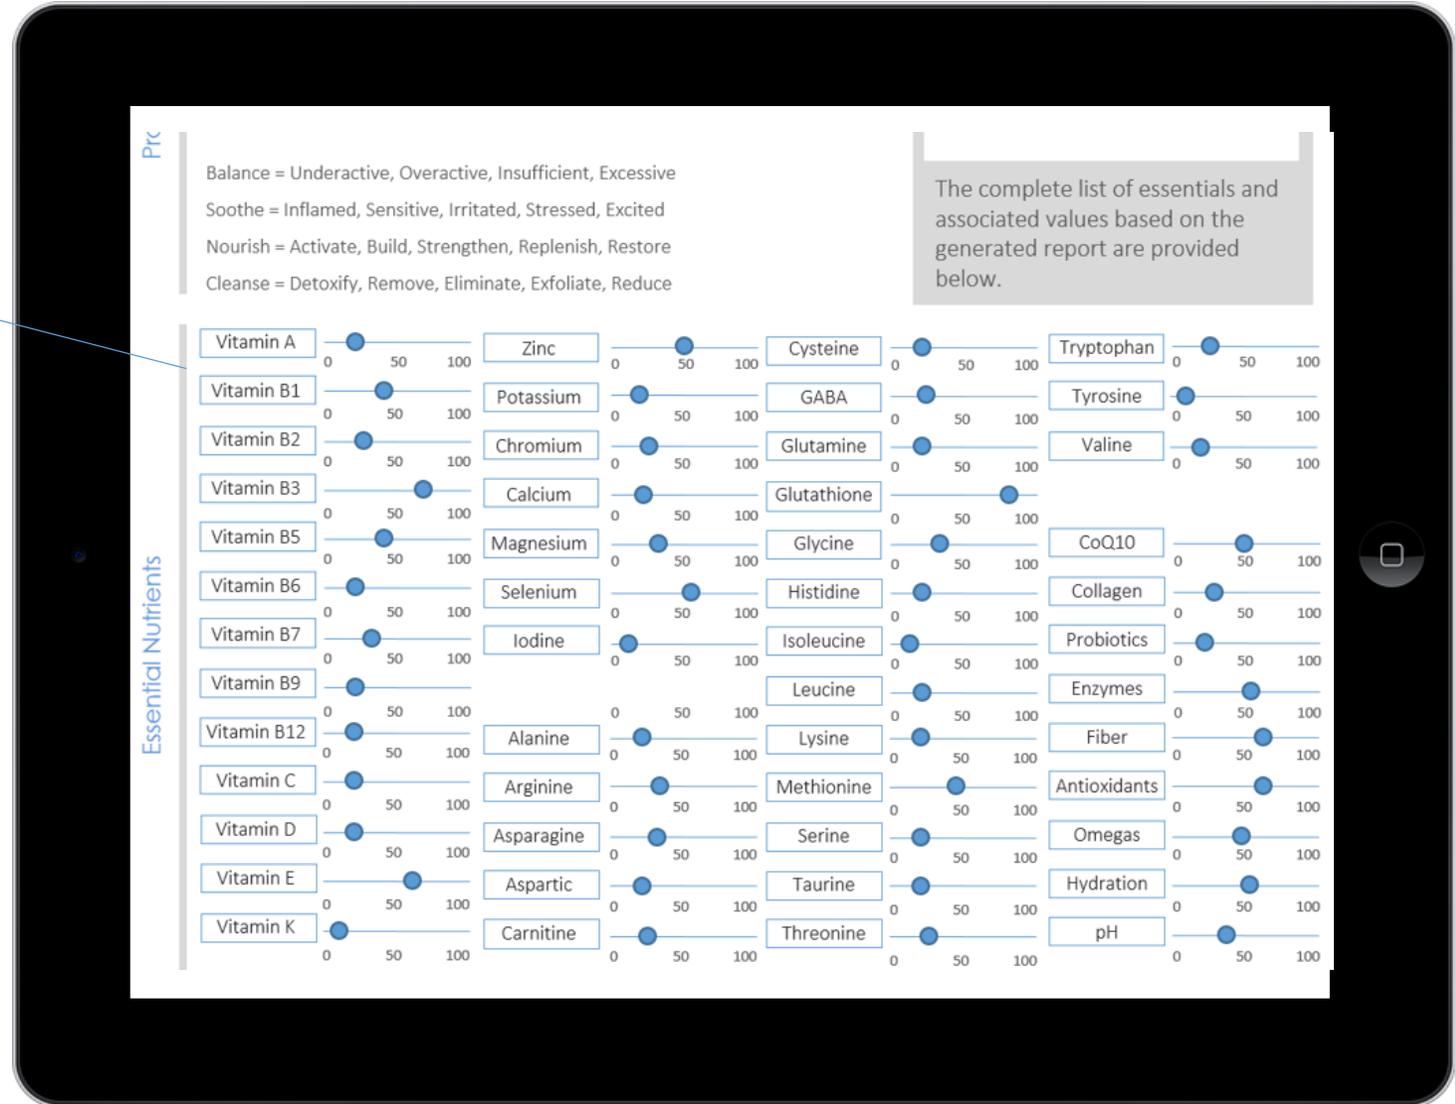

As illustrated, the Essential Nutrients section can provide valuable insight as to the nutrients that may be supportive and relevant based on the generated results.

KEY:

No Supportive RELEVANCE

Maximum Supportive RELEVANCE

SECTION 3 - INFLUENCES

This section reflects the highlighted influences found on the Basic Report within the GRID Highlighter section.

Corresponding measurements are provided to illustrate the supportive emphasis that should be considered for each.

KEY:

No Supportive RELEVANCE

Maximum Supportive RELEVANCE

The tablet displays a report interface with the following sections:

- Influence:** The GRID Highlighter targets key internal and external factors that may be influencing skin appearance based on the identifiable characteristics. Below are factors considered within your generated report.
 - GRID Highlighter**
 - [Liver](#)
 - [Heavy Metals](#)
- Products:** Products chosen are calculated through a rigorous process of elimination. The client demographics, identified protocol and GRID highlighted factors are equated to generate the products.
 - Determined Products**
 - [Liver Cleanse Plus](#)
 - [Fiber Max](#)
- Organ Systems:** DermaGRID uses an advanced algorithm designed to reflect organ systems most influenced & supported by the data generated:
 - Client Demographics + Dermal Characteristics + Internal & External Factors + Identified Essentials + Determined Products = Organ System Correlations

ORGAN SYSTEM CORRELATIONS

Organ System	Correlation Level (0-100)
Circulatory	~75
Digestive	~75
Hepatic	~85
Respiratory	~25
Urinary	~15
Immune	~25
Structural	~45
Nervous	~65
Endocrine	~45
Lymphatic	~75

SECTION 4 - PRODUCTS

This section reflects the products reflected on the Basic Report within the Determined Products section.

Corresponding measurements are provided to illustrate the supportive relevance to aid with prioritization.

KEY:

No Supportive RELEVANCE

Maximum Supportive RELEVANCE

The tablet displays a report interface with the following sections:

RELEVANCE

Most Influenced
RELEVANCE

The tablet displays a report interface with the following sections:

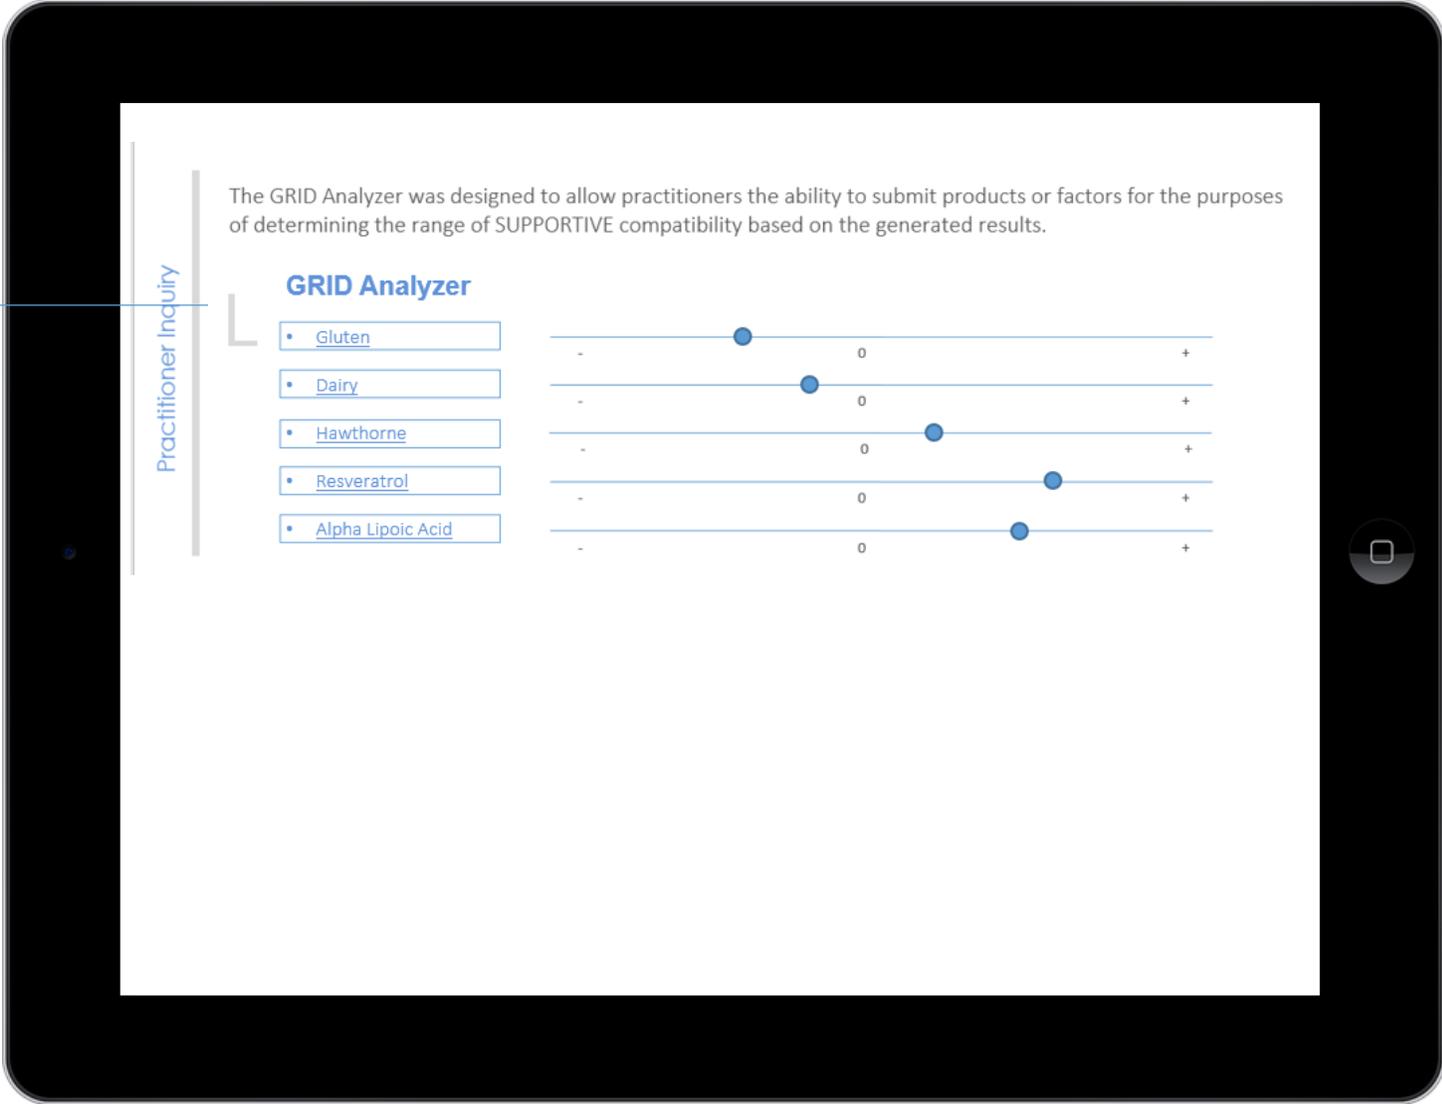

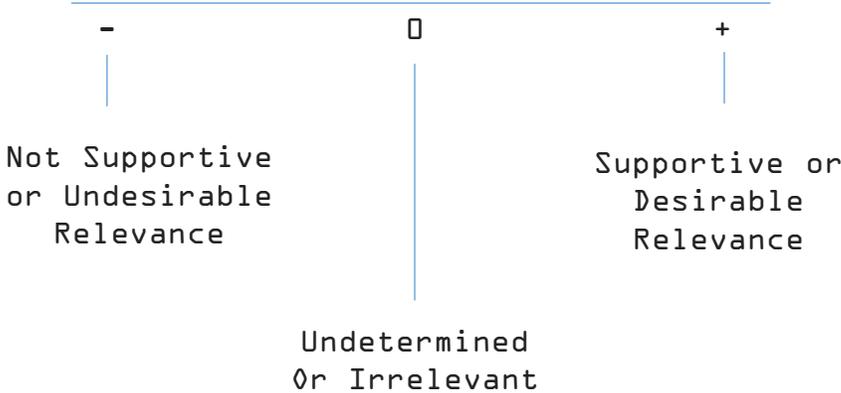

- Influence:** The GRID Highlighter targets key internal and external factors that may be influencing skin appearance based on the identifiable characteristics. Below are factors considered within your generated report.
 - GRID Highlighter:**
 - [Liver](#)
 - [Heavy Metals](#)
 - Progress bars for [Liver](#) (at ~90%) and [Heavy Metals](#) (at ~55%).
- Products:** Products chosen are calculated through a rigorous process of elimination. The client demographics, identified protocol and GRID highlighted factors are equated to generate the products.
 - Determined Products:**
 - [Liver Cleanse Plus](#)
 - [Fiber Max](#)
 - Progress bars for [Liver Cleanse Plus](#) (at ~95%) and [Fiber Max](#) (at ~55%).
- Organ Systems:** DermaGRID uses an advanced algorithm designed to reflect organ systems most influenced & supported by the data generated:
 - Client Demographics + Dermal Characteristics + Internal & External Factors + Identified Essentials + Determined Products = Organ System Correlations
 - ORGAN SYSTEM CORRELATIONS:**
 - Circulatory: ~60%
 - Digestive: ~70%
 - Hepatic: ~80%
 - Respiratory: ~20%
 - Urinary: ~10%
 - Immune: ~20%
 - Structural: ~30%
 - Nervous: ~40%
 - Endocrine: ~30%
 - Lymphatic: ~50%

SECTION 6 - INQUIRIES

This section is the generated measurements of products or factors that the practitioner submitted for compatibility review.

Practitioners can analyze up to 5 products or factors (such as foods) to determine the supportive relevance based on the generated results.

KEY:

SECTION 8 - SUPPORT

This section provides the Top Ten Foods that may provide optimal support based on the previous sections.

In addition, other supporters including homeopathics, herbs and essential oils are highlighted for consideration

A Hormone Chart is provided to highlight specific hormones commonly attributable to the dermal characteristics identified.

CHARACTERISTICS

Hormones

Progesterone	Estrogen	Testosterone
Thyroid Panel	Adrenal Panel	Immune Panel

A Food Chart is provided to highlight supportive foods based on the generated results. As well, Additional Supporters are provided such as homeopathics and essential oils.

TOP 10 FOOD SUPPORTERS

Cherries	Walnuts
Garlic	Cabbage
Grapefruit	Turmeric
Dandelion Greens	Lemons
Quinoa	Salmon

ADDITIONAL SUPPORTERS

Peppermint Oil
Juniper Oil
